**Applicant/Owner Agreement**

1. I agree to install all meters in accordance with District and manufacturer's recommended best installation practices.
2. I agree to keep all meters repaired and in good operating condition at all times.
3. I agree to replace damaged and/or non-repairable meters with an equal or better quality meter at my own expense and to notify the District of the meter change and the beginning and ending readings of each meter.
4. I agree to furnish the District a complete list of crops and crop acres grown on the GPU.
5. I agree to furnish the District all meter volume totalizer readings annually for the duration of the District's meter reimbursement program reporting period (usually five years).

# NPGCD Agricultural Meter Reimbursement Program Application

## Information about and Requirements for Reimbursement:

- One half (1/2) the actual cost of each meter installed for agricultural irrigation purposes is eligible for reimbursement.
- Must complete registration with the District prior to purchasing and installing meters.
- Registration is no guarantee of full, partial or of any reimbursement. Reimbursement is contingent upon program funds availability and meeting program requirements.
- Reimbursement is on a first come first served basis.
  - First come first served does not mean first to register their intention to seek reimbursement.
  - First come first served does mean first to complete the entire process of registering, completing all paperwork, installing all meters, receiving District inspections and furnishing all necessary receipts to the District and requesting reimbursement.
- Installation costs, other equipment costs, labor costs and meters for nonagricultural irrigation purposes are not eligible for reimbursement.
- Meters and installations must be inspected by the District prior to reimbursements.
- Must be meters installed on agricultural irrigation systems.
- **Meters must be purchased between April 29, 2015 and December 31, 2019.**
- Meters and installation must meet District Rules and be installed in accordance with manufacturer's installation guidelines.
- Meters must be maintained in good working order and repaired expeditiously as necessary.
- Non-repairable meters must be replaced at the owner's expense.
- Must furnish original receipts to the District that clearly show the meter costs and serial numbers. Copies of bank or credit card statements are not acceptable.

## Other considerations

- Meters purchased and installed during the eligibility period (April 29, 2015 through December 31, 2019) without prior registration with the District will be evaluated on an individual basis and may or may not receive reimbursement.
- Applicants must notify the District after the meters' installation is complete.
- Replacement meters (replacing a meter bought under this program) are not eligible for cost reimbursement. Meters bought to replace meters bought without program funds are eligible for reimbursement.
- The District undertaking or operating future reimbursement programs is not guaranteed.
