Groundwater Conservation Reserve

GPU should retain its existing Groundwater Conservation Reserve Bank: Yes No

If you chose yes above, District staff will be in touch with you to determine the documentation needed to retain Groundwater Conservation Reserve. GPU documentation must be provided and the GPU form accepted before the end of the calendar year to be in effect for that production report.

Once a GPU has been established, it must remain in effect for one production year.

Once received by the District, a Declaration of Joined GPU will be sent to you for review and approval. The Declaration of Joined GPU must be signed and notarized by all Water Right Owners. This document will be included in the completed Declaration of Joined GPU. Joined GPUs must comply with all applicable District Rules, and specifically Chapter 7 Groundwater Production Units.

DISTRICT USE ONLY

Received Date: _____

Verified and entered by: _____

Old GPU: _____

New GPU: _____
